**Cross Sectional Shape:**

Plain rectangular, straight face

**Ring Style:**

Concentric

**Radial Wall Thickness:**

0.2200 inches

**Overall Width:**

0.1880 inches

**Standard Bore Diameter:**

4.500 inches

**Joint Style:**

Diagonal joint

**Material:**

Aluminum alloy 7075

**Material Specification:**

Qq-a-225/9, t73 federal specification single material response or qq-a-250/9, t7351 federal specification single material response or qq-a-200/11, t73510 federal specification single material response or qq-a-200/11, t73511 federal specification single material response

**Fsc Application Data:**

Aircraft landing gear

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A08400
