Cylinder Quantity:

6

Starting Method:

Electric

Reduction Gear Ratio:

1.85 to 1

Cooling Type:

Direct water

Piston Displacement:

2598.0 cubic centimeters

Integral Reduction/reverse Gear:

Included

Outboard Drive Steering Mechanism Operating Method:

Hydraulic motor

Special Features:

Shaft length 30.0 inch, counter rotation; proshaft rated horsepower 275hp; rpm at full throttle 5800-6400

Fuel Type:

Gasoline

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T274-a
