Overall Height:

4.6895 inches

Product Name:

Seal set-carbon face, input quill, prgb

Special Features:

Test / qualification reference: vtde 113287 bhti report 901-993-852

Functional Description:

Operating temperature: -65f to 280f, maximum differential pressure: -4.5 to 1.5 psid case to ambient pressure differential, seal cup material: 300 series cres, ring material: 440 cres or equivalent

Material:

Stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
