Cylinder Quantity:

4

End Application:

Chemical biological protective shelter model 8e1

Inclosure Type:

Open

Cylinder Arrangement:

Straight in-line

Closed System Hull Cooling Feature:

Not included

Dual Ignition System:

Not included

Crankshaft Rotation Direction:

Counterclockwise

Direct Reversible Feature:

Not included

Supercharger:

Included

Transmission:

Not included

Clutch:

Not included

Governor Controlled Feature:

Not included

Product Name:

Engine, apu

Special Features:

Stroke of apu is 3.64 inches with a displacement of 122.0 cubic inches. Horsepower rating is 32.8 continuous at 1800 rpm. Dry weight is 450lbs.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T197-a
