Overall Length:

2.102 inches

Diameter:

16.320 inches

End Application:

Aircraft eng f100

Design Type:

Axial compressor

Hardness Rating:

25.0 rockwell c and 33.0 rockwell c

Criticality Code Justification:

Agav

Engine Section Location:

Low pressure compressor

Stage Number:

1

Special Features:

T.O. 2j-f100-4; goes on the fan front case and stator

Material:

Steel comp 410

Material Specification:

Ams5613 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10700
