Overall Length:

1.513 inches

Overall Width:

0.660 inches

Material Thickness:

Between 0.015 inches and 0.041 inches

End Application:

F100-pw-220 engine

Product Name:

Plate-plain, augmentor support nozzle

Engine Section Location:

Exhaust

Special Features:

2 holes 0.276-0.286 in dia, 1.013 in apart, beveled corners

Material:

Titanium alloy

Material Specification:

Ams 4916 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A530f0
