**Overall Length:**

4.330 inches

**Overall Width:**

1.000 inches

**End Application:**

F100pw0229 aircraft engine

**Hardness Rating:**

34.0 rockwell c and 44.0 rockwell c

**Criticality Code Justification:**

Agav

**Engine Section Location:**

Combustion chamber

**Special Features:**

8 mtg holes 0.078-0.109; acts as a brace on the combustion chamber

**Material:**

Nickel alloy

**Material Specification:**

Ams5540 assn standard single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A530f0
