Overall Length:

4.330 inches

Overall Width:

1.000 inches

End Application:

F100pw0229 aircraft engine

Hardness Rating:

34.0 rockwell c and 44.0 rockwell c

Criticality Code Justification:

Agav

Engine Section Location:

Combustion chamber

Special Features:

8 mtg holes 0.078-0.109; acts as a brace on the combustion chamber

Material:

Nickel alloy

Material Specification:

Ams5540 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A530f0
