Overall Length:

3.140 inches

Overall Width:

1.000 inches

End Application:

F100pw0229 aircraft eng

Criticality Code Justification:

Agav

Engine Section Location:

Combustion chamber

Special Features:

T.O. 2j-f100-54; stators run counterclockwise; matl is cobalt

Material:

Nickel alloy

Material Specification:

Pwa647 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A10700
