**Overall Length:**

2.230 inches

**Overall Width:**

1.820 inches

**End Application:**

F100 aircraft gas turbine engine

**Design Type:**

Axial compressor

**Criticality Code Justification:**

Apgf and czbj and abhp and abmk and feat

**Engine Section Location:**

Compressor

**Special Features:**

Used on the front compressor stator variable, inlet; air foil 80 degrees 14 minutes; not the same as p/n 4079350

**Material:**

Nickel alloy

**Material Specification:**

Pwa649-1 mfr ref single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A10700
