End Application:

F100-pw-229 aircraft gas turbine engine

Design Type:

Axial compressor

Criticality Code Justification:

Czbj and feat and czcj and apgf

Product Name:

Original name ring segment, air sealing, turbine

Engine Section Location:

Turbine

Stage Number:

3

Special Features:

T.O. 2j-f100-54, fig 73 ind 54; 7 units per assembly; replaces p/n 4069977-01

Material:

Nickel alloy

Material Specification:

Ams5536 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A10700
