Overall Length:

1.575 inches

Overall Width:

0.945 inches

Material Thickness:

Between 0.020 inches and 0.025 inches

End Application:

F100-pw-100 aircraft gas turb eng

Design Type:

Axial compressor

Criticality Code Justification:

Czbj and feat and abhp and abpx and abmk

Product Name:

Original name seal, turbine stator

Engine Section Location:

Turbine

Stage Number:

3

Special Features:

Use only on p/n nha 4083716-01

Material:

Cobalt alloy

Material Specification:

Ams5608 assn standard single material response

Reference Data And Literature:

T.O. 2j-f100-14, fig 132, in 14

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10700
