End Application:

DIES-EL-ENG-INEN

Product Name:

Fuel pump assembly, gear type

Functional Description:

A mechanical device used to move liquid fuel to individual fuel injection nozzles, to engine combustion chambers of a diesel engine

Reference Data And Literature:

T.O.35c2-3-339-4, fig.33

Fsc Application Data:

Fuel system, diesel engine, nonaircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
