**End Application:**

DIES-EL-ENG-INEN

**Product Name:**

Fuel pump assembly, gear type

**Functional Description:**

A mechanical device used to move liquid fuel to individual fuel injection nozzles, to engine combustion chambers of a diesel engine

**Reference Data And Literature:**

T.O.35c2-3-339-4, fig.33

**Fsc Application Data:**

Fuel system, diesel engine, nonaircraft

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23900
