End Application:

Hercules motor model d-298-h diesel engine

Product Name:

Pump, fuel injection

Special Features:

Rated horsepower at 2, 200 rpm; with p/n 10967 hydraulic head and rotor assembly

Functional Description:

Pump is specifically designed to increase the pressure of, to meter the amount of, and to control the distribution of fuel to the individual fuel injection nozzles of the diesel engine

General Description:

Rated horsepower at 2, 200 rpm; with p/n 10967 hydraulic head and rotor assembly

Fsc Application Data:

Fuel system, diesel engine, nonaircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
