Overall Length:

9.600 inches

Overall Width:

5.200 inches

Product Name:

Valve, degasser

Special Features:

Gsafety: designed to meet class i deviation 2 requirements; materials of construction; valve body: aluminum; elastomers: viton o-rings, polytetrafluoroethylene seal, acetal guide rings; pilot control system solenoids, tubing and fittings: brass solenoids and fittings with flared copper tubing; temperature rating: minus 40 degree to plus 160 degree f; flow: 150 gpm (568 l/min) for 30 ssu products; viscosity range: 30 to 100 ssu; solenoids voltage: plus 10.2 to 13.6 vdc, current: s1: 1 amp, s2: 1 amps ; pressure rating: non-shock pressure: 150 psi (10.3 bar); differential pressure: 100 psi (6.9 bar)

General Description:

Two-stage, preset valve designed for refined fuel applications including gasoline, diesel fuel, and fuel oil; indexible design for 90 degree rotational adjustment of valve outlet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
