Fabrication Method:

Welded

Filler Cap:

Included

Opening Quantity:

2 top

Capacity:

78.0 gallon, us measure

Product Name:

Tank, fuel, engine

Special Features:

Assembly, fuel tank, diesel, large; next assembly 12505663; used on fmvta1p2; fuel tank components which are not welded to the fuel tank vessel shall meet the requirements for a 48-hour salt spray 1aw astm b117; fuel tank shall have all ports closed and submerged in a tank of water with 7-10 lbs of air pressure for 5 minutes. There shall be no evidence of air leakage from the submerged tank in the 5 minutes. Any evidence of leakage will constitute a failure. An optional method is the use of a leak detection compound in accordance with mil-prf-25567; production quality control test: a. Test on unit every 50 unit/lot to assure control of the part

Shape:

Irregular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T109-c

Mil-std (military Standard):

Mil-prf-25567 spec.
