**End Application:**

F111 aircraft pylon fuel system

**Functional Description:**

External stores refuel and fuel transfer from aux to wing tank

**General Description:**

N8.5 in. L, approx 4.0 in. H x 4.5 in w; parts incl air hsg, actuator 80214, piston 40744; fuel hsg, float 40782, piston 25003, diaphragm 25018 and housing; single coil, continuous duty solenoid, du type 18-30 v, m65-350 degrees f

**Fsc Application Data:**

Valve linear, directional control, powered, engine acft

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
