End Application:

F111 aircraft pylon fuel system

Functional Description:

External stores refuel and fuel transfer from aux to wing tank

General Description:

N8.5 in. L, approx 4.0 in. H x 4.5 in w; parts incl air hsg, actuator 80214, piston 40744; fuel hsg, float 40782, piston 25003, diaphragm 25018 and housing; single coil, continuous duty solenoid, du type 18-30 v, m65-350 degrees f

Fsc Application Data:

Valve linear, directional control, powered, engine acft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
