General Description:

Designed for partially submerged operation, electrically driven, 2 pumps, 200 cps, for use with fuel and oil, 10000.0 pph flow rate, 40.0 psig output flow, 8000.0 rpm rating, vertical pumping position, rotates counter clockwise, double stage impeller, single inlet port w/strainer, single thd outlet port size 1.313-12 un-3b thd and 0.900 in. Diameter opening, o/a dim. Approx 9.969 in. Lg by 8.375 in. Diameter max, external discharge

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
