General Description:

Designed for partially submerged operation, electrically driven, direct current, 27 volts, 31.8 amps, 9000.0 pph, single speed, for use with fuel and oil, horizontal pumping position, single stage impeller, single inlet port w/strainer, single outlet port w/std fitting size 1.859 in. Min to 1.891 in. Maximum diameter opening, o/a d1m. Approx 9.750 in. Maximum lg by 6.754 in. Maximum h by 4.859 in. Maximum w, oval-earred flange mounting w/12 holes, size 0.276 in. Min to 0.286 in. Maximum equally spaced on 6.155 in. Lg by 4.255 in. W bcd, external discharge

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
