Storage Temperature Range:

-65.0/+85.0 degrees fahrenheit

End Application:

Drawing name low level control unit

Functional Description:

Fuel sys improvement

Reference Data And Literature:

Tcto 1h-1-620

General Description:

Electronic module that receives signals from fuel tanks and governs operation of fuel transfer pumps, also sends warning signals to cockpit of low fuel levels

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
