Mounting Hole Diameter:

0.312 inches

Center To Center Distance Between Mounting Holes:

2.812 inches

Mounting Flange Shape Style:

Offset rectangular (incl square)

Barrel Outside Diameter:

3.062 inches

Engaging Mechanism Style:

Peripheral outboard gear drive w/worm shaft, and rubber compression cushion

Shaft Rotation Direction:

Counterclockwise

Armature Actuation Device Type:

Relay

Engaging Mechanism To Armature Positional Relationship:

Straight

Center To Center Distance Between Shaft Center And Mounting Hole:

1.969 inches

Voltage In Volts:

12.0

Special Features:

Mounting flange paralel to starter frame, additional mounting ear welded to frame 90.0 degrees from flange

Terminal Type And Quantity:

1 threaded stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23400
