Mounting Hole Thread Direction:

Right-hand

Mounting Style:

Bracket mtd w/three mtg holes, top hole threaded

End Application:

Truck tractor

Unpackaged Unit Length:

217.0 millimeters

Shaft Rotation Direction:

Clockwise

Ground Polarity Type:

Negative

Maximum Output Current Rating In Amps:

130.0

Rectifier Location:

Integral

Grounding Method:

Internal

Product Name:

Series 22-s1 heavy duty brush generator

Voltage In Volts:

12.0

Special Features:

Gmax speed 10, 000 rpm continuous, 12, 000 rpm intermittent; temperature limits m30.0 fah - 200.0 fah ambient; type 22si-350; remanufactured p/n 10459192; distance center to center of bolt holes 198.0 mm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A14700
