End Application:

Pacer special b-2

Criticality Code Justification:

Feat

Special Features:

Gused to start and stop all engines individually or simultaneously by manual or automatic mode, also regulates coupling and de-coupling of amad during engines starts ats valve and cross bleed start air

Nuclear Hardness Critical Feature:

Hardened

General Description:

Fused to start and stop all engines individually and simultaneously by manual mode or automatic, also regulates coupling/de-coupling of amad during engine start ats valve and for cross bleed start air

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
