Body Diameter:

3.312 inches

Body Inside Diameter:

2.875 inches

Filtration Rating In Microns:

40.0

Flow Direction:

Inside out

Design Type:

Nonreusable

Temperature Rating:

Between -65.0 degrees fahrenheit and 275.0 degrees fahrenheit

Bodylength:

1.750 inches

Filtering Media Design:

Spiral wound single filtering media response

Special Features:

With gasket

Material:

Cellulose filtering medium

Media For Which Designed:

Fuel/oil, hydrocarbon

Style Designator:

Cylindrical w/closed ends

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
