Thread Direction:

Right-hand

Mounting Type:

Inlet connection bottom

Body Diameter:

6.000 inches

Body Inside Diameter:

3.625 inches

End Application:

Aircraft support equipment test console, b-2 bomber

Bodylength:

5.000 inches

First Intake Connection Type:

Threaded external pipe bottom

First Intake Thread Series Designator:

Npt

First Intake Thread Size:

2.000 inches

Product Name:

Exposed-element air intake filter

First Intake Thread Direction:

Right-hand

Filtering System For Which Designed:

Full flow

Special Features:

Exposed 99% efficient exposed polyester filter media with a foam prefilter; replacement element polyester element p/n 4399k53 dimensions 3.625 id x 5.750 od x 4.750 length; hepa replacement element p/n 9179k13; maximum cfm polyester element 135, hepa element 69; polyester filter rated to 5 micron; hepa filter rated to 0.3 micron; temp range m15.0 fah - 220.0 fah.

Material:

Steel body and polyester body

Media For Which Designed:

Air

Style Designator:

Cylindrical w/closed ends

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A24000
