End Application:

Nha: filter, fluid pressure

Design Type:

Reusable

Tempurature Rating:

Between -45.0 degrees fahrenheit and 225.0 degrees fahrenheit

Product Name:

Filter element

Special Features:

Filter element features a helical outer wrap, high strength upstream and downstream support, and ultipor iii filter medium; coreless filters use reinforced polymer end caps and do not include an internal core (the core is a part of the filter housing); max. Working pressure: 6000psi; fatigue pressure rating: 3000psi; burst pressure: 20, 000psi; filter element collapse pressure: 150psid; elements are: incinerable, crushable, lightweight and easy change-out

Style Designator:

Cylindrical w/out container

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
