Maximum Operating Pressure:

250.0 pounds per square inch

Special Features:

It is very important that proper installation and maintenance procedure be followed. This includes a requirement that only dried, minus 45 degree f dew point at barrier pressure, and filtered with less than 10 micron filter size. Ship air is to be used as a barrier.

Material:

Stainless steel body

Material Specification:

Astm a276 type 316 (s31600) assn standard 1st material response body

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
