# Filtering System For Which Designed:

Full flow

## **Special Features:**

flow rate: 2600 1/h.; fluuids: hydraulic fluids according to air 3514-mil I 7808-mil I23699. Pressure drop at 18 cst clean element; pressur drop 145 psi; screen area 15.6; absolute filtration rating 40 um; maximum workiing temp from -55 degrees to +175 deg; weight 245 g.; construction core: stainless steel; end caps: light alloy; filter medium: stainless steel; install this filter element on mandrel p/n 014704000nb0a; with two o-rings p/n aj0283001780ha0

#### Material:

Stainless steel frame

# Media For Which Designed:

Fuel/oil, hydrocarbon

#### **Style Designator:**

Cylindrical w/out container

### **Fsc Application Data:**

Cfm1, turbo jet f108 eng, kc135 a

Shelf Life:

N/a

**Unit Of Measure:** 

## **Demilitarization:**

No

Fiig:

A24000
