Design Type:

Reusable

Filtering System For Which Designed:

Full flow

Special Features:

Preferred material cres 416, cond. A, per astm-a-582; dia. 0.203 with 7 holes, 6 equally spaced; o.D. Of screen is 0.855 in. Dia., thickness is 0.014 in. Min., 0.024 in. Max.

Material:

Steel comp 304l screening

Material Specification:

Qq-s-766 federal specification single material response screening

Media For Which Designed:

Fuel/oil, hydrocarbon

Surface Treatment:

Passivate screening

Surface Treatment Specification:

Cp-3001, type 4 mfr ref single treatment response screening

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
