Overall Width:

2.300 inches

Differential Pressure:

50.0 pounds per square inch

End Application:

Used on uh-2a seasprite helicopter

Design Type:

Nonreusable

Temperature Rating:

Between -65.0 degrees fahrenheit and 300.0 degrees fahrenheit

Bodylength:

4.240 inches

Special Features:

5.5 gpm rated flow; 50 psi differential pressure

Style Designator:

Rectangular (incl square)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A24000
