**Governor Type:**

Electronic regulation

**Body Material:**

Aluminum

**Special Features:**

Speed setting 20 turn potentiometer. Gain single turn 0 to 100%. Droop 0 to 15%. Fuel selection diesel, gasoline or gas. Remote speed use dyns 10000 potentiometer. Operating voltage 12 or 24v. Ambient operating temp minus 40degree to plus 180 f. Output signal pwm current to 6amp max. Heavy conformal coating for moisture and vibration protection. Input frequency 2500 to 5000 hz. Weight 635 grams. Generator paralling option, temp stable, mounts in any position, all electric

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A512f0
