End Application:

P3 orion-cn235 aircraft ground equipment generator sets

Product Name:

Engine governor

Special Features:

Microprocessor digital controller, operating voltage 9-30vdc, 7a max. Continuous rated output current, 14a max. Surge current, terminal strip with 7h 7 wire euro style terminals, engine speed mpu measurement range 10 mpu hz to 14,000 mpu hz. Governing speed range with mpu 500 mpu hz to 11,000 mpu hz. Engine speed ignition measurement range 2 hz. To 350hz. Governing speed range with ignition 25hz to 300hz. Used primarily to govern diesel or gas fueled engines of generator sets

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
