Product Name:

Sensor, pressure

Special Features:

Accuracy 0.25 percent bsl, long term stability: 0.5 percent fso of calibration, typical life cycle: 100 million cycles, proof pressure: 2 times rated pressure or 13,000 psi max, input resistance: 15,000 ohm, temperature ranges: operational: 0degrees to 160degrees f. Compensated: 30degrees to 160f

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A516j0
