**Special Features:**

Dual magnets are wired to connector pins and are electrically insulated establishing a controlled air gap; o-ring seal to prevent oil leakage; remote indication of excessive wear/impending failure results from ferrous chips bridging the air gap between magnets

**Material:**

Aluminum

**Surface Treatment:**

Anodize

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A520y0
