End Application:

F404 jet engine

Criticality Code Justification:

Agav

Product Name:

Tube assembly, no.2 seal drain

Special Features:

Material ams5557 type 1

Material:

Steel

Test Data Document:

Ams2616 standard (includes industry or association standards, individual manufactureer standards, etc.).

General Description:

Tube embedded in the mainframe to convey oil from midframe compressor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
