Thickness (non-core):

Between 0.068 inches and 0.076 inches

Material Thickness (non-core):

0.014 inches

Largest Outside Diameter (non-core):

6.812 inches

Lug Width (non-core):

Between 0.452 inches and 0.458 inches

Angle Between Lugs In Deg (non-core):

60.000

Design Type:

Wet

Material Location (non-core):

Both sides

Design Form (non-core):

Solid

Disk Type:

External lug

Material Outside Diameter (non-core):

Between 6.342 inches and 6.352 inches

Material Inside Diameter (non-core):

Between 3.240 inches and 3.260 inches

Facing Attachment Method (non-core):

Bonded

Smallest Inside Diameter (non-core):

3.240 inches

Construction:

Solid

Flexibility:

Rigid

Material:

Copper alloy

Fsc Application Data (non-core):

Ship and boat propulsion components

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A521p0
