Terminal Type:

Connector

Temperature Rating:

-65.0 degrees fahrenheit and 160.0 degrees fahrenheit

Body Diameter:

2.590 inches

Current Type:

Dc

Body Length:

7.190 inches

Environmental Protection:

Explosion proof and watertight

Shaft Rotation Direction:

Clockwise and counterclockwise

Drive Type:

Direct

Duty Cycle:

Intermittent

Current Rating In Amps:

0.15

Braking Method:

Electric

Rotation In Deg:

175.0

Output Drive Torque Rating:

60.0 inch-pounds

Limit Switch Control:

Included

Manual Override:

Not included

Angular Shaft Rotation:

Limited

Mounting Facility:

Threaded mounting holes

Voltage In Volts:

115.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A30500
