**Major Diameter:**

1.000 inches

**Overall Length:**

5.438 inches

**Outside Diameter:**

2.000 inches

**Bearing Type:**

Plain

**Length From Universal Joint Spider Centerline To Hub End:**

2.719 inches

**Bore Style (non-core):**

Err-090

**Keying Facility Quantity:**

1

**Hub Bore:**

Included

**Outside Shape:**

Round

**Distance From Centerline To Keying Facility:**

0.625 inches

**Special Features:**

Width: 0.125 in. ; connection end type: hub

**Style Designator (non-core):**

Err-090

**Specification Or Standard:**

A class

**Fsc Application Data:**

Overhead hoist

**Reference Number Differentiating Characteristics:**

As differentiated by outside shape, outer periphery machined surface finish, split hub feature, length from universal joint spider centerline to hub end, hub end thread provision, hub bore, bore style, major diameter, width, keying facility quantity, distance from centerline to keying facility, hub securing hole, length

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A521w0
