Major Diameter:

1.000 inches

Overall Length:

5.438 inches

Outside Diameter:

2.000 inches

Bearing Type:

Plain

Length From Universal Joint Spider Centerline To Hub End:

2.719 inches

Bore Style (non-core):

Err-090

Keying Facility Quantity:

1

Hub Bore:

Included

Outside Shape:

Round

Distance From Centerline To Keying Facility:

0.625 inches

Special Features:

Width: 0.125 in. ; connection end type: hub

Style Designator (non-core):

Err-090

Specification Or Standard:

A class

Fsc Application Data:

Overhead hoist

Reference Number Differentiating Characteristics:

As differentiated by outside shape, outer periphery machined surface finish, split hub feature, length from universal joint spider centerline to hub end, hub end thread provision, hub bore, bore style, major diameter, width, keying facility quantity, distance from centerline to keying facility, hub securing hole, length

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A521w0
