End Application:

Antenna pedestal, meteorology

Design Type:

Single reduction

Total Ratio:

87.000 to 1

Input Shaft Type:

Pinion

Input Shaft Quantity:

1

Output Shaft Type:

Pinion

Output Shaft Quantity:

1

Shaft Position:

Shaft centrally located

Features Provided:

Shipboard usage design

Special Features:

Gear type-pinion; straight input shaft diameter 0.500 in.; straight output shaft diameter 2.208 in.; housing matl alum. Or cres steel, matl output shaft cres steel, case is phosphate coated type m-class 2, output pinion has 24 involute crowned teeth w/diametral pitch of 12 and a pitch diameter of 2 in., a root diameter of 1.849, input pinion has a sq. Key size of 0.125 x 0.125 x 1.000 min., the direction of rotation when manually rotated is reversible, the output shaft turns at 29.33 rpm w/input speed of 2552 rpm, operating temp -28/+65 degrees c, life expectancy 1000 hrs min. W/o maintenance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
