Overall Thickness:

2.748 inches

End Application:

Weapons system seawolf class ssn

Special Features:

Material per astm b150 alloy c63200, coated with karon type v, used on torpedo tube shutter door drive linkages assembly

Material:

Nickel alloy and aluminum alloy and copper alloy

Style Designator:

Square, round bore

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A52200
