Design Type:

Multiple reduction

Gear Type:

Helical and spur

Total Ratio:

31: 1

Lubrication System:

Oil bath

Input Shaft Type:

Keyway

Input Shaft Quantity:

1

Output Shaft Type:

Keyway

Output Shaft Quantity:

1

Shaft Position:

In line; must be horizontal

Product Name:

Speed reducer

Special Features:

output 55 rpm; torque capacity varies w/hp; dimension 9 3/16 in. Incl. Motor flange and output shaft; 2 piece die cast aluminum housing with hardened steel gears; designed for direct drive w/nema 56c face, 1800 rpm (max) motor, purchased separately.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A522e0
