Key Width:

0.175 inches first end

Bore Diameter:

2.0050 inches first end

Bore Shape:

Straight first end

Keying Facility Quantity:

1 first end

Securing Method:

Screw first end

Insert Material:

Rubber butadiene nitrile

Product Name:

Coupling, shaft, flex

Special Features:

Tire type full flex coupling assembly. Matt; nuna n rubber insert steel outer. One side is straight through bore the other is splined 14 teeth 12 24dp.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A522b0
