Body Style:

Webbed, with lightening holes

Spline Quantity:

12 both ends

Pitch Diameter:

4.3333 inches

Teeth Quantity:

52

Bore Style:

Involute spline both ends

Spline Pitch Diameter:

0.6000 inches both ends

Hardness Rating:

90.0 rockwell superficial 15-n and 91.5 rockwell superficial 15-n

Outside Diameter:

4.498 inches

Tooth Form:

Standard

Pressure Angle:

20.0000 degrees

Distance Between Body Face And Protruding Hub End:

1.876 inches first end

Face Width:

0.400 inches

Bore Diameter:

0.695 inches both ends

Hub Style Designator:

1 step both ends

End Length:

0.690 inches second end

End Diameter:

1.378 inches second end

First Step Length:

1.376 inches first end

First Step Diameter:

1.535 inches second end

Material:

Steel comp e9310

Material Specification:

Ams6265 assn standard single material response

Surface Treatment:

Oxide and chromate

Style Designator:

Protruding hubs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A27300
