Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

1.2500 inches

Teeth Quantity:

80

Face Type:

Concave

Bore Style:

Plain both ends

Mounting Hole Type And Quantity:

2 plain transversely through face

Outside Diameter:

1.281 inches

Tooth Direction:

Right

Mating Thread Lead Quantity:

1

Pressure Angle:

14.5000 degrees

Helix Angle:

1.7831 degrees

Distance Between Body Face And Protruding Hub End:

0.220 inches first end

Face Width:

0.180 inches

Bore Diameter:

0.187 inches both ends

Hub Style Designator:

Plain first end

Hub Diameter:

0.375 inches first end

Mounting Hole Diameter:

0.125 inches transversely through face

Material:

Copper alloy

Style Designator:

Protruding hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
