Body Style:

Webbed, solid

Attachment Method:

Mounting hole

Pitch Diameter:

8.8750 inches

Teeth Quantity:

68

Bore Style:

Plain both ends

Mounting Hole Thread Qty Per Inch (tpi):

24 axially through hub, first end

Outside Diameter:

9.125 inches

Teeth Type:

Single helix

Tooth Form:

Standard

Tooth Direction:

Right

Pressure Angle:

14.5000 degrees

Helix Angle:

18.0000 degrees

Face Width:

2.500 inches

Bore Diameter:

4.437 inches both ends

Bolt Hole Circle Diameter:

5.187 inches axially through hub, first end

Material:

Steel

Style Designator:

Flush hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
