Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

22.5000 inches

Teeth Quantity:

90

Outside Diameter:

25.5000 inches

Nominallength:

9.812 inches

Teeth Type:

Single helix

Tooth Form:

Standard

Tooth Direction:

Right

Pressure Angle:

20.0000 degrees

Helix Angle:

15.0000 degrees

Face Width:

4.875 inches

Mounting Hole Diameter:

0.875 inches transversely through hub, first end

Special Features:

Counterbored, back side of gear 12.250 in.Min, 12.251 in.Max diameter counterbore, 9/16 in.Deep

Material:

Steel

Style Designator:

Solid back ring, protruding hub, recessed hub

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27300
