Body Style:

Plain, solid

Attachment Method:

Mounting hole

Pitch Diameter:

0.6000 inches

Teeth Quantity:

12

Outside Diameter:

0.6830 inches

Nominallength:

0.625 inches

Teeth Type:

Spiral

Tooth Direction:

Right

Pressure Angle:

14.5000 degrees

Helix Angle:

33.5500 degrees

Distance Between Body Face And Protruding Hub End:

0.375 inches first end

Face Width:

0.188 inches

Bore Diameter:

0.3770 inches both ends

Hub Style Designator:

Plain both ends

Hub Diameter:

0.500 inches second end

Mounting Hole Diameter:

0.144 inches transversely through hub, first end

Material:

Steel

Style Designator:

Protruding hubs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27300
